

2026 Basic Life Support New Provider Course

Purpose and Intended Audience

To enable healthcare providers in the lifesaving skills of cardiopulmonary resuscitation (CPR) for all ages (including ventilation with a barrier device, a bag-mask device, and oxygen), use of an automated external defibrillator (AED), and relief of foreign-body airway obstruction (FBAO), as defined by the American Heart Association (AHA). This course is for providers taking Basic Life Support (BLS) for the first time.

Objectives/Learner Outcomes

Upon completion of the course, the participant will be able to:

1. Describe the importance of high-quality CPR and early defibrillation.
2. Describe the steps in the chain of survival.
3. Complete BLS skills on an Adult, Child, and Infant as well as choking and AED use.
4. Demonstrate effective use of a barrier device and a bag-mask device.
5. Complete the written exam with a score of 84% or higher.
