Blank Pediatric Residency Program AIM Statement

The mission of the Blank Pediatric Residency Program is to educate residents to provide team-based, family-centered care to infants, children and adolescents in a collegiate, community setting. This will be accomplished by:

1. Preparing residents for careers across the spectrum of general pediatrics or fellowship training in a pediatric subspecialty.
2. Providing flexibility for individualized educational experiences that will support residents toward their practice goals.
3. Promoting personal growth and wellness while cultivating cohesive, close-knit relationships within the program and community.
4. Encouraging a spirit of inquiry and scholarship.
5. Emphasizing residents as teachers.
6. Empowering residents to advocate for children and their families in the communities where they live and practice.
