EXPANDED CARE

- Stoddard Cancer Center expanded its commitment to comprehensive, patient-centered cancer care with the opening of the UnityPoint Health - John Stoddard Cancer Center - Medical Oncology & Hematology Clinic along with expanded chemotherapy infusion services on September 2.
- John Stoddard Cancer Center - Radiation Oncology and Brachytherapy Center added a new linear accelerator, The Edge. This new machine brings advanced technology to radiation treatment, expanding options for patients and enhancing care.
- Stoddard Cancer Center became the first in Central Iowa to offer scalp cooling. Cooler Heads' Amma™ is the first FDA-cleared, portable scalp cooling system designed to help reduce hair loss during chemotherapy. This innovative therapy gently lowers the temperature of the scalp before, during and after treatment, limiting how much chemotherapy reaches the hair follicles.
